

NETHAVATH PRAVEEN

B.Tech at IIIT Hyderabad (Expected 2027) — Aspiring Full Stack Software Engineer

✉ praveennayak045@gmail.com |  linkedin.com/in/nethavath-praveen-0a7a84287 |  GitHub |  9391206849

Education

International Institute of Information Technology, Hyderabad (IIITH)

Aug 2023 – May 2027

B.Tech in Electronics and Communication Engineering (ECE)

Jawahar Navodaya Vidyalaya (JNV), Warangal & Puducherry

Secondary and Senior Secondary Education

Experience

NVIRI Solutions — Order Management System (OMS)

Jan 2025 – Apr 2025

Software Intern (Remote)

Company

Demo

- Improved data retrieval efficiency by **15%** by developing scalable backend microservices using **Java Spring Boot** and designing a **PostgreSQL** database with **35+** tables.
- Increased merchant productivity by **25%** by building a cross-platform application in **Flutter** that consumed internal **RESTful APIs** for seamless order management.
- Enhanced code maintainability by applying **Clean Architecture** principles, demonstrating strong **attention to detail** in defining service boundaries and interfaces.
- Showcased **problem-solving** and **communication** skills by owning features end-to-end, leading to a **10%** faster feature delivery cycle through effective stakeholder collaboration.

Projects

FooDel — Full-Stack Food Delivery Platform with Payments

 GitHub

- Built a full-stack food delivery application using the **MERN stack**, processing over **1,000+** simulated transactions with **99.9%** accuracy via the **Stripe API**.
- Implemented robust authentication with **JWT + bcrypt**, cart management, and real-time order status tracking.
- Designed RESTful APIs and an admin panel, improving data management efficiency by **40%**.

CampusMart @ IIITH — Full-Stack Marketplace

 GitHub

 Website

- Architected a full-stack **MERN** marketplace that acquired **100+** active users in its first month and facilitated over **200+** successful student-to-student transactions.
- Implemented a **RESTful API** with **15+ endpoints**, secured with **JWT authentication**, for user, cart, and product management.
- Developed a responsive React-based UI with category filtering and transaction history.

CodeCrux — Competitive Programming Practice Portal

 GitHub

- Built a competitive programming platform with the **MERN stack**, secured using JWT-based authentication.
- Integrated **Clist.by API** to track global contests and added **Google Calendar synchronization** for reminders.
- Added personalized features like daily challenges and tag-based filtering, boosting user engagement by **30%** and daily active users by **15%**.

Technical Skills

Languages	JavaScript (ES6+), Python, Java, C++, SQL, HTML, CSS
Databases	PostgreSQL, MySQL, MongoDB
Frameworks/Tools	React.js, Node.js, Express.js, Spring Boot, Flask, Flutter, Git/GitHub
Deployment	Heroku, Render, Netlify, Vercel
Practices	REST API Design, Payment Gateway Integration, JWT/OAuth Authentication, Clean Architecture

Leadership Achievements

JEE Mains AIR 2107
JEE Advanced AIR 3894
FFE Scholar

Elected NSS Co-ordinator, managing **1500+** volunteers.
Felicity Fest Marketing Team Member.
NCC 'A' Certificate Holder.
